Ahmed Awan

AI Engineer | Python • RAG • LLMs • Streamlit | Building & Deploying
Real AI Products
Rawalpindi, Punjab, Pakistan

Summary

I build AI-powered systems and applications using Python, LLMs, and modern web technologies. I started as a Frontend Developer, working with React, Next.js, and TypeScript. Now I'm focused on AI Engineering, building real-world AI applications, LLM integrations, and automation systems. What I've built so far: AI Discord Bot with persistent memory and custom personality (Python, Discord.py, OpenRouter) AI-powered Resume Analyzer with scoring and feedback system Chatbot applications using OpenAI and Gemini APIs Current focus: LLM applications and integrations RAG-based systems (in progress) AI automation workflows Multi-agent systems I can build both the frontend interface and the AI backend, combining product design with real AI engineering. My approach is execution-first: build, ship, and improve through real projects rather than theory.

Experience

Internee.pk
React Developer Intern
March 2026 - May 2026 (3 months)
Islamabad

AI-Powered Resume Analyzer: Developing an intelligent tool to analyze and rank resumes, utilizing React.js for the frontend and integrating AI logic for data processing.

E-Commerce Platform: Architecting a full-scale e-commerce interface (Amazon Clone) featuring product listings, shopping cart functionality, and secure checkout flows.

AI Chatbot Integration: Implementing a real-time conversational interface powered by OpenAI/Gemini API to enhance user engagement.

Notes Application: Building a productivity tool (Google Keep Clone) featuring CRUD operations and persistent data storage.

Website Redesign: Leading the UI/UX overhaul of the interneer.pk platform to improve responsiveness, navigation, and visual identity.

Version Control & Deployment: Managing project codebases using GitHub, ensuring clean commit history and efficient deployment workflows.

Developed and integrated an AI-powered chatbot using OpenAI/Gemini APIs to enable real-time user interaction and enhance engagement within web applications.

Self Employed

UI UX Designer

December 2024 - December 2025 (1 year 1 month)

Rawalpindi, Punjab, Pakistan

Designed UI layouts and user flows for web applications.

Converted UI designs into functional front-end interfaces.

Focused on usability and clean visual hierarchy.

Education

Virtual University of Pakistan

Bachelor of Science, Computer Software Engineering · (July 2025 - August 2029)

GOVT. Post graduate college Asghar Mall, Rawalpindi, Pakistan

HSSC Intermediate, Computer Science · (August 2023 - September 2025)

Govt boys high school, Rawalpindi, Pakistan

Matriculation in Biology, Biology, General · (August 2021 - July 2023)
